Gulf Shores, Alabama 36547

**Re: Engineering Services Proposal
Sidewalk Improvements
Fort Morgan Road to 20th Avenue**

Dear Mayor Craft:

DMD Engineers appreciates the opportunity to submit this proposal for providing engineering services for your proposed sidewalk improvements project to extend the sidewalks along Alabama Highway 59 from Fort Morgan Road to 20th Avenue.

This Proposal includes the following items of professional engineering services:

1. Design of the proposed improvements to consist of 8' wide sidewalks on both sides of Alabama Highway 59 and improvements to driveways not replaced by the current ALDOT Access Management Project.
2. Preparation of Plans, Specifications, and Contract Documents as required for the City of Gulf Shores to accept bids for the proposed project.
3. Assisting the City with obtaining bids for the project.
4. Making any necessary recommendations to the City concerning acceptance of the bids and preparing contract documents for execution.

The total cost to provide these engineering services is \$62,000.00.

ALDOT did not require the City to obtain a grading permit for the current sidewalk project due to the access management portion of the current project. Since your proposed sidewalk project is also in an area with ALDOT access management work, we did not include any costs for preparing a grading permit in our Proposal. If ALDOT requires a grading permit, we would propose to negotiate a cost to prepare this permit on the basis of the engineering effort required to prepare the permit.

Our Proposal does not include any services during construction of the proposed improvements; however, we would very much appreciate the opportunity to submit a proposal for providing these services at an appropriate time. Please let me know if you or your staff have any questions or need any additional information to review this Proposal.

Very Truly Yours,

DMD ENGINEERS, INC.

Paul E. Darnell, PE
