Mr. Robert C. Craft, Mayor  
City of Gulf Shores  
Post Office Box 299  
Gulf Shores, AL 36547

Dear Mayor Craft:

I have reviewed the fact sheet regarding the Gulf Shores Waterway Village Multimodal Access Project, and was extremely impressed and excited with what it would mean to the Gulf Shores area. Growth in the Gulf Shores area is evident, and this plan provides much needed infrastructure.

The addition of the roadway access to the Future Terminal Area of the Jack Edwards Airport is of particular interest to us. Our planned construction of a new Fixed Based Operation Facility on the proposed new ramp area south of Runway 9/27, which has already been approved by the FAA, would be greatly enhanced by this additional road access. The planned facility consists of 21,000 square feet, including hangar, office and aircraft maintenance space. We anticipate hiring 15-20 local employees at this new facility.

We look forward to the benefits afforded us by this project and to working with the Jack Edwards Airport and the City of Gulf Shores.

Sincerely,

A handwritten signature in black ink, appearing to read 'Arve W. Henriksen, Jr.', written in a cursive style.
