

**WHAT IS A HURRICANE?  
WHERE DO HURRICANES FORM?  
WHO IS WATCHING FOR HURRICANES?**

All of these questions can be answered when you visit the Gulf Shores Museum. An interactive display will take viewers on a flight with the “Hurricane Hunters” as they fly through the eye of the storm. Learn more about past hurricanes from images of both Hurricane Ivan in 2004 and Hurricane Frederic in 1979.

Call the museum for a list of special video programs.
